Report on utilisation of USD 10,000 donation for patients' welfare

Introduction

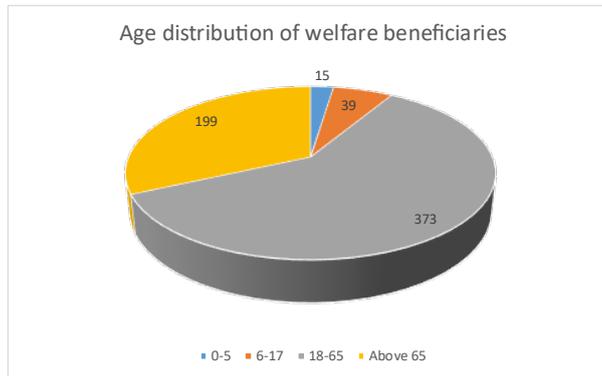

Mr Shiraz Dhanani graciously donated USD 10K in the last quarter of 2024 to support the treatment of needy patients for their treatment at the Salamieh medical centre. This report provides a brief update on the utilisation of the funds received and the beneficiaries.

Utilisation analysis

In total, 626 patients benefited from the welfare provided to them to support their treatment from January 2025 to May 2025. Out of this, 341 (54%) were female and 285 (46%) were males. 546 (87%) of the beneficiaries were from the city of Salamieh and the remainder from rural areas of Salamieh district. The lower utilisation of patients from the rural areas is mainly due to lack of awareness and accessibility.

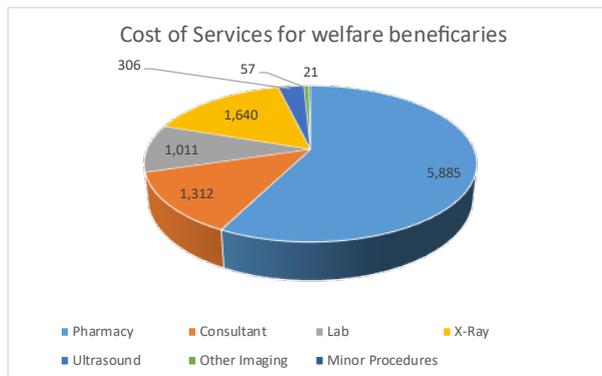

The average cost of welfare per beneficiary is USD 16.34 per patient, with a range of USD 1 to USD 126.

The chart below provides an analysis of the beneficiaries by age group:

More than half (58%) of the beneficiaries were for support for the supply of drugs and medicines, mainly for chronic illnesses.

The chart below provides the utilisation by type of services received by the beneficiaries.

Appendix 1 to this report provides the full details of beneficiaries, treatment condition and type of services provided. As agreed, the names of patients have not been provided in order to protect confidentiality.

Appendix 1

No.	Gender	Aga	Town of Residence	Medical Diagnosis	Treatment Date	Amount of Welfare	Pharmacy	Consultant	Lab	X-Ray	Ultrasound	Other Imaging	Minor Procedure
1	Male	68	Salamieh- Urbon	Breast tumor - Hip replacement - Heart failure	2-Jan-2025	1,637,650	822,650	40,000	35,000	690,000	40,000	10,000	-
